# MZ60 metal film thermistors

#### ■ Features

- · Linearly positive TCR
- Rapid thermal response speed
- Blue coating, color code marking, blistertape and lead forming available

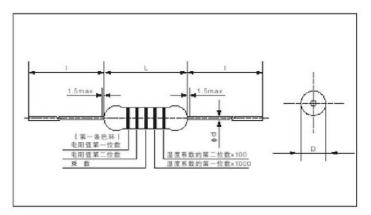

## ■ Applications

Suitable for the temperature compensation thermal protection

### ■ Reference Standards

Q/ATK01-1992

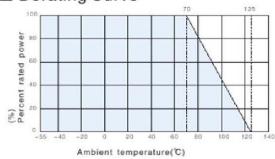

## ■ Construction(mm)

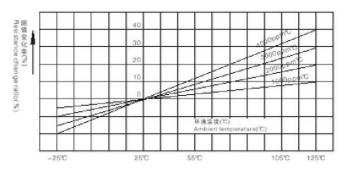

## ■ Dimensions(mm)

Туре	Lmax	Dmax	d±0.05	L±3
MZ60-1/6W	3.8	2.1	0.5	28.0
MZ60-1/4W	7.0	2.5	0.6	28.0

# ■ Derating Curve

### ■ Resistance Change VS Temperature

# ■ Technical Specifications

Туре	Rated Power	Max Woking Voltage	Insulate voltage	TCR(ppm/C)	Tolerances	Resistance Range	Rating. AMB.temp	Operating. Temp.range
MZ60-1/6	1/6W	150V	250V	1000~2400	±2% ±5%	4.7Ω~1ΚΩ	70°C	-55℃~125℃
MZ60-1/4	1/4W	250V	350V	500~3900	±10%	1Ω~2ΚΩ	700	-55 6~ 125 6

# MZ60 metal film thermistors

#### ■ Performance

Testilian	Cassifications	Test Method
Test Item	Specifications	GB/T7153-2002
Rapid change of temperature	∆R≤ ±(1%R+0.05Ω)	-55℃/125℃, 5cycles
Leaching	∆R≤ ±(1%R+0.05Ω)	350±10℃, 3.5±0.5S
Climatic category	∆R≤ ±(3%R+0.1Ω)	275℃, 16h/55℃, RH93±3%, 24h/ -55℃, 2h/8.5kpa, 15~35℃, 1h
Endurance at 70℃	∆R≤ ±(3%R+0.1Ω)	70℃, P <sub>s</sub> , 1000h

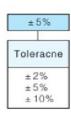

#### ■ How To Order

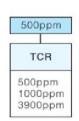

#### Example

- 1	Boxes
	- 1
Pa	ckaging
	Tape Bag

## Properties of precised metalfilm resistors

Our precised metalfilm resistors use highgrade ceramics body (Al203 content > 96%) as substrate for its high quality in insulation, dielectric coefficient, and mechanical strength, excellent alloy is gained through vacuum metallizing process.leads&caps imported are conform to MIL standard, its special design make resistance element body and caps connected with each other inseparably.

Better TCR is available through special treatment on the top of element body for low resistance.

Resistors for military application meet the requirements of MIL standard (USA) and GJB (CHINA) with high stability as well as perfect TCR and precision .

Its resin-coating&mould package make products be in good properties regarding high voltage-resistance and moisture-proof.
